

## *The World's Best MATHread® Cylindrical Thread Rolling Dies*

CJWinter is an approved - licensed MATHread® tooling supplier. CJWinter specializes in cylindrical MATHread® tooling. This unique technology manufactures a full range of cylindrical thread rolling dies that include:

- Radial Dies
- Tangential Dies
- Radial Infeed Axial Dies (E-Series)
- Machine Dies

### **In over 33 Billion Installations, MATHread®:**

- Fixed Cross-Threading – It Never Cross-Threads
- Eased Every Assembly – Installers Say It “Glides” In
- Aligned Components – Finds Holes and Forces Itself Straight
- Fixed Clogged Internal Threads – Slides Through Paint Build-Ups

### **MATHread® Technology Makes EVERY Job User-Friendly!**

#### **MATHread's ... It's What We Do**

##### **CJWinter:**

- Manufactures full range of the highest quality MATHread® cylindrical Thread Rolling Dies
- Offers lead times second to none
- Provides engineering support to streamline tooling implementation
- Offers On Call & On-site Technical Support
- Optimizes thread blank geometry which dramatically increases thread roll life & reduces price per part
- Specializes in Hydromat E Series & Screw Machine MATHread® applications
- Develop tooling to optimize performance:
  - Customize thread roll tooling geometry
  - Offer variety of thermal processes, tooling materials and tooling coatings
- Offers **FREE** - no obligation trial of CJWinter Cylindrical Mathread® Rolling Dies
