## 234SA-03 Series Radial Knurling Attachment For Hydromat 36/100 Recessing Spindle

With its fast and intuitive setup, CJWinter's 234SA-03 Radial knurling attachment provides an efficient and reliable knurling capability.

This attachment, with its compact 4.00" height from spindle to face, has close to shoulder rolling to within 0.125" depending on the specific application.

In many cases, the 234SA-03 attachment can roll a knurl behind a shoulder and/or on both sides of a shoulder simultaneously.

### The New 234SA-03 Features:

- Proven CJWinter Reliability and Precision
- Complete Control Over Roll Infeed and RPM
- Competitive Pricing for Unparalleled Value
